

Maternal & Child Health

PLAN BENEFIT MODEL: Evidence-Informed Coverage and Assessment

This document provides an updated listing of evidence-informed health plan benefits for women, children and adolescents. The benefits are based on the latest research and findings from the American Academy of Pediatrics, the American Academy of Family Physicians, and recommendations from the U.S. Department of Health and Human Services. The requirement of the Patient Protection and Affordable Care Act of 2010 and the Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008 were used to guide the recommendations, where necessary.

An assessment section is included in each recommendation for comparison with your current benefit plan. This assessment, or gap analysis, may enable you to determine which benefit you need to include or change to meet the legislative requirements and to improve care for this population.

INDEX OF SERVICES

I. Recommended Minimum Plan Benefits:

Preventive Services

- A. Well-Child Services
- B. Immunizations
- C. Preventive Dental Services
- D. Early Intervention Services for Mental Health/
Substance Abuse
- E. Preventive Vision Services
- F. Preventive Audiology Screening Services
- G. Unintended Pregnancy Prevention Services
- H. Preventive Preconception Care
- I. Preventive Prenatal Care
- J. Preventive Postpartum Care
- K. Preventive Services (General)

II. Recommended Minimum Plan Benefits:

Physician/Practitioner Services

- A. Services Delivered by a Primary Care Provider
- B. Services Delivered by a Mental Health/Substance Abuse
Provider
- C. Services Delivered by a Specialty Provider or Surgeon
- D. E-Visits and Telephonic Visits

III. Recommended Minimum Plan Benefits: Emergency Care, Hospitalization, and Other Facility-Based Care

- A. Emergency Room and Urgent Care Services
- B. Inpatient Substance Abuse Detoxification

- C. Inpatient Hospital Service: General Inpatient/Residential Care
(Including Mental Health/Substance Abuse)
- D. Inpatient Hospital Service or Birth Center Facilities:
Labor/Delivery
- E. Ambulatory Surgical Centers or Outpatient
Hospital Services
- F. Mental Health/Substance Abuse Partial-Day Hospital (or Day
Treatment) or Intensive Outpatient Care Services

IV. Recommended Minimum Plan Benefits: Therapeutic Services/Ancillary Services

- A. Prescription Drugs
- B. Dental Services
- C. Vision Services
- D. Audiology Services
- E. Nutritional Services
- F. Occupational, Physical, and Speech Therapy Services
- G. Infertility Services
- H. Home Health Services
- I. Hospice Care
- J. Durable Medical Equipment (DME), Supplies, and Medical Foods
- K. Transportation Services

V. Recommended Minimum Plan Benefits: Laboratory, Diagnostic, Assessment, and Testing Services

- A. Laboratory Services
- B. Diagnostic, Assessment, and Testing
(Medical and Psychological) Services

This Maternal & Child Health Plan Benefit Model was developed by the National Business Group on Health, which should be cited accordingly. Copyright 2012 National Business Group on Health.

Sample Plan Benefit and Assessment Key

The grid below is a key that outlines each recommended benefit. At the end of each recommendation is an Assessment for use in determining if your current plan includes the benefit.

Recommended Plan Benefits: One of Five Types of Service			
THE SPECIFIC TYPE OF BENEFIT			
Definition of Benefit		Covered Providers	
A summary definition of the type of benefit and/or rationale for including the benefit.		Covered providers and/or related benefit information.	
Recommended Benefit Coverage Limits	Recommended Exceptions	Inclusions	Exclusions
Typically expressed as the maximum amount of benefit covered by the plan.	Plan provisions that reflect unique circumstances and allow for exceptions to be made.	Particular benefits that should be covered by the type of benefit.	Particular benefits that should not be covered by the type of benefit.
Recommended Cost-Sharing	Copayment / Coinsurance Level (0-5 / 0%-25%)	Out-of-Pocket Maximum	
Recommendation on copayment (HMO model) or coinsurance (PPO model) amount.	Recommended copayment and coinsurance (in-network) levels correspond to the key summarized below: Copayment Coinsurance 0=\$0 =0% 1=\$10-\$20 =10% 2=\$25-\$40 =15% 3=\$45-\$60 =20% 4=\$75-\$100 =25% 5=\$100+ =25%+	Denotes whether individual expenses apply to the maximum expense paid per individual or per family in a single calendar year. After that amount is reached, the health plan will pay 100% of covered charges for the remainder of the calendar year. Individual (1): \$1,500 Individual plus one (2): \$3,000 Family (3+): \$4,500

I. Recommended Minimum Plan Benefits: Preventive Services			
A. WELL-CHILD SERVICES			
Definition of Benefit		Covered Providers	
Medical services designed to promote and protect the health of infants, children, and adolescents. These services include comprehensive health assessments; age-appropriate screening, counseling, preventive medication, and preventive treatment; parent and child education; and anticipatory guidance. ¹		Covered services must be furnished by or under the direction of a primary care provider (family physician, pediatrician, nurse practitioner, general practitioner, internal medicine physician).	
Recommended Benefit Coverage Limits	Recommended Exceptions	Inclusions	Exclusions
Visits as defined by Bright Futures Periodicity Chart	Include provisions for children with complex case-management needs (e.g., flex benefits).	All appropriate preventive care. Medical necessity supported by the Plan Benefit Model definition.	All others as defined by the health plan.
Recommended Cost-Sharing	Copayment / Coinsurance Level (0-5 / 0%-25%)	Out-of-Pocket Maximum

^AThe Advisory Committee on Immunization Practices (ACIP) releases updated recommendations on immunizations at regular intervals. Employers should instruct their health plan administrator(s) to provide coverage for newly-recommended immunizations immediately following approval from ACIP.

I. Recommended Minimum Plan Benefits: Preventive Services			
C. PREVENTIVE DENTAL SERVICES			
Definition of Benefit		Covered Providers	
Covered preventive services include risk assessments and anticipatory guidance in order to promote oral health, ¹ oral examinations, and diagnostic procedures. ²		Covered services must be furnished by or under the direction of a licensed dentist or licensed dental hygienist. Licensed dental hygienists must be overseen by a dentist or primary care provider or operate in conformance with state regulation for the independent practice of preventive dentistry. Risk assessments, anticipatory guidance, and fluoride varnish may be performed by a primary care provider.

I. Recommended Minimum Plan Benefits: Preventive Services			
D. EARLY INTERVENTION SERVICES FOR MENTAL HEALTH/SUBSTANCE ABUSE			
Definition of Benefit		Covered Providers	
Medical services designed to educate and counsel individuals and families about behaviors that facilitate mental health, improve personal resiliency, facilitate early intervention and prevent the escalation of sub-clinical problems, and monitor and treat V-code conditions.		Covered services must be furnished by or under the direction of a primary care provider (family physician, pediatrician, nurse practitioner) or a mental health professional (psychiatrist, clinical psychologist, licensed clinical social worker, licensed professional counselor, psychiatric nurse practitioner). ¹	
Recommended Benefit Coverage Limits	Recommended Exceptions	Inclusions	Exclusions
Eight visits per calendar year. ²	Include provisions for children with complex case-management needs (e.g., flex benefits). Consider extending benefit for multiple providers.	Screening (including family psychosocial screening), monitoring, and treatment of DSM-IV, V-code conditions.	All others as defined by the health plan. <i>Please refer to the "Mental Health/Substance Abuse" benefit for additional coverage information.</i>

I. Recommended Minimum Plan Benefits: Preventive Services

E. PREVENTIVE VISION SERVICES

U.S. Preventive Services Task Force (USPSTF) 2011

Update of Previous USPSTF Recommendation

This recommendation updates the 2004 recommendation. The USPSTF now recommends vision screening for the presence of amblyopia and its risk factors for all children 3 to 5 years of age (B recommendation).² For children <3 years of age, the USPSTF concludes that the current evidence is insufficient to assess the balance of benefits and harms of vision screening (I statement).

Recommendations of Others

Preschool vision screening is recommended by several other organizations; however, the specific age for initiation of screening and the particular screening tests that are recommended vary. The American Academy of Family Physicians is updating its recommendation, which is similar to that of the USPSTF.⁴ The American Academy of Pediatrics recommends screening for distance visual acuity, ocular alignment, and ocular media clarity for children 3 to 6 years of age and older.³ The American Academy of Ophthalmology and the American Association for Pediatric Ophthalmology and Strabismus recommend vision screening during the preschool years.³ The American Optometric Association recommends a comprehensive eye examination at 3 years of age.⁵

National Business Group on Health

Clinical Preventive Service Recommendations

U.S. Preventive Services Task Force (USPSTF) Recommendation

The USPSTF recommends vision screening for all children at least once between the ages of 3 and 5 years to detect the presence of amblyopia or its risk factors.¹

Evidence Rating: *B (Recommended/At Least Fair Evidence)*

The USPSTF found at least fair evidence that the service improves important health outcomes and concludes that benefits outweigh harms. The USPSTF found no direct evidence that screening for visual impairment in children leads to improved visual acuity. However, studies from Sweden and Israel suggest that early screening for visual impairment may reduce the prevalence of amblyopia in children.² Also, the USPSTF found fair evidence that screening tests have reasonable accuracy in identifying strabismus, amblyopia, and refractive error in children with these conditions; that more intensive screening compared with usual screening leads to improved visual acuity; and that treatment of strabismus and amblyopia can improve visual acuity and reduce long-term amblyopia.^{1,2}

Definition of Benefit		Covered Providers	
Medical services designed to identify children who may have eye or vision abnormalities, or risk factors for developing eye problems. Examination of the eyes should be performed beginning in the newborn period and at all subsequent well-child care visits. Additional preventive vision screening is recommended for children who are unable to be screened in well-child care due to time or health constraints. ¹		Covered services must be furnished by or under the direction of a primary care provider (family physician, pediatrician, nurse practitioner, general practitioner, internal medicine physician).	
Recommended Benefit Coverage Limits	Recommended Exceptions	Inclusions	Exclusions
Two visits outside of regular well-child care ^A between birth and age 5. ¹⁻³	Include provisions for children with complex case-management needs (e.g., flex benefits).	Screening to detect amblyopia, strabismus, and defects in visual acuity in children younger than age 5 years. ² Exams include: visual acuity tests, stereopsis, vision history, external eye inspection, ophthalmoscopic examination, tests for ocular muscle motility and eye muscle imbalances, and monocular distance acuity. ³	All others as defined by the health plan. <i>Please refer to the "Vision Services" benefit for additional coverage information.</i>

5. American Optometric Association	The need for comprehensive vision examinations of preschool and school-age children. www.aoa.org/x5419.xml . Accessed April 27, 2012.	Professional Guidance

^aMost children and adolescents receive routine vision screening during the course of well-child care. However, young children who are uncooperative, children with special needs, and children who miss or delay well-child care need access to vision screening outside of designated preventive visits. The "Preventive Vision Services" screening benefit is designed to support this need.

I. Recommended Minimum Plan Benefits: Preventive Services			
F. PREVENTIVE AUDIOLOGY SCREENING SERVICES			
Definition of Benefit		Covered Providers	
Medical services to detect and diagnose speech, hearing, and language disorders.		Covered services must be furnished by or under the direction of a primary care provider (family physician, pediatrician, nurse practitioner, general practitioner, internal medicine physician) or a covered specialist (audiologist or speech pathologist).	
Recommended Benefit Coverage Limits	Recommended Exceptions	Inclusions	Exclusions
Three visits between birth and 19 years of age. Services must be rendered during the course of a well-child care visit or with referral from a PCP to a covered specialist. ¹	Include provisions for children with complex case-management needs (e.g., flex benefits).	All appropriate preventive care. Medical necessity supported by the Plan Benefit Model definition.	All others as defined by the health plan.

^A Obstetricians and gynecologists (OB-GYNs) are considered "primary care providers" only when they are providing preconception, prenatal, and postpartum care. They are considered "medical specialists" when providing all other types of services. Copayment/coinsurance amounts should be adjusted accordingly.

I. Recommended Minimum Plan Benefits: Preventive Services			
I. PREVENTIVE PRENATAL CARE			
Definition of Benefit		Covered Providers	
<p>Prenatal care: Medical services designed to facilitate the health of a pregnant woman or fetus, or that have become necessary as a result of pregnancy. Covered services may also address conditions that might complicate a pregnancy, threaten a woman's ability to carry the fetus to term, or deliver the fetus safely.¹</p> <p>Prenatal pediatric care: A single visit designed to allow a pediatrician (or other primary care provider) to gather basic information from parents, provide information and advice, and identify high-risk situations in which parents may need to be referred to appropriate resources for help.² This visit is relevant only in situations where the infant's primary care provider did not provide prenatal care to the infant's mother.</p>		<p>Covered services must be furnished by or under the direction of a primary care physician (family physician, general practitioner, internal medicine physician, OB-GYN^A), nurse practitioner, or a medical professional who is licensed to provide pregnancy-related primary care services (e.g., certified nurse midwife).</p>	
Recommended Benefit Coverage Limits	Recommended Exceptions	Inclusions	Exclusions
<p>20 prenatal care visits¹ 1 prenatal pediatric visit²</p>	<p>Include provisions for women with complex case-management needs (e.g., flex benefits).</p>	<p>All appropriate preventive care, including all routine screening and diagnostic tests (e.g., amniocentesis, chorionic villus sampling, etc.). Medical necessity supported by the Plan Benefit Model definition.</p>	<p>All others as defined by the health plan.</p>

Federally Required

^A Obstetricians and gynecologists (OB-GYNs) are considered "primary care providers" only when they are providing preconception, prenatal, and postpartum care. They are considered "medical specialists" when providing all other types of services. Copayment/coinsurance amounts should be adjusted accordingly.

^B Lactation consultation visits may be used at any point during pregnancy and in the year after birth.

I. Recommended Minimum Plan Benefits: Preventive Services			
K. PREVENTIVE SERVICES (GENERAL)			
Definition of Benefit		Covered Providers	
Medical services that are designed to detect the existence of, or risk for, diseases, conditions, and problems in asymptomatic people.		Covered services must be furnished by or under the direction of a primary care provider (family physician, general practitioner, internal medicine physician, nurse practitioner, pediatrician), or other qualified provider.	
Recommended Benefit Coverage Limits	Recommended Exceptions	Inclusions	Exclusions
Coverage for clinical preventive services for at-risk children, adolescents, and women of childbearing-age that are not typically delivered in routine: <ul style="list-style-type: none"> • Well-child care • Preventive preconception, prenatal, or postpartum care Frequency as defined by the U.S. Preventive Services Task Force or other cited reference.	N/A	All appropriate preventive care. Screening services for high-risk populations are covered, as deemed medically necessary. Services may include, but are not limited to: <ul style="list-style-type: none"> • Alcohol misuse screening and counseling^{1,2} • Cervical cancer screening² • Chlamydia screening² • Depression screening² • Diabetes² • Gonorrhea screening² • HIV screening² • Hypertension² • Lead screening² • Lipids² • Obesity² • Sexually transmitted infection (STI) counseling • Syphilis² • TB screening² • Tobacco use screening and counseling² 	All others as defined by the health plan.
Recommended Cost-Sharing	Copayment / Coinsurance Level (0-5 / 0%-25%)	Out-of-Pocket Maximum	
None	0 / 0%	N/A

V. Recommended Minimum Plan Benefits: Laboratory, Diagnostic, Assessment, and Testing Services

B. DIAGNOSTIC, ASSESSMENT, AND TESTING (MEDICAL AND PSYCHOLOGICAL) SERVICES *Continued*

^AA comprehensive recommendation regarding genetic testing is beyond the scope of this document. Employers should consult with their plan administrator(s) about the evidence of benefit for genetic testing. Employers are encouraged to provide coverage for genetic testing when it meets medical necessity criteria for the beneficiary or his or her family, and when the results of the test will inform a major medical decision (e.g., selecting one type of treatment over another, terminating a pregnancy).

^BNeuropsychological evaluations are important when determining or outlining subtle and severe neurocognitive deficits among patients with cerebrovascular conditions, traumatic brain injury, epilepsy, multiple sclerosis, and HIV; as well as hydrocephalus, neurotoxic exposure, brain tumors; and other common medical conditions such as thyroid and collagen-vascular disorders, among others. Neuropsychological evaluations also provide critical adjunctive information for the diagnosis of conditions such as dementia.
